Why? - Passionate to secure a challenging position in a reputable organization to expand my learnings, knowledge, and skills. I have:

- 3.5 months of experience in learning developing applications on IOS
- Works with Swift, UIKit, CocoaPods (Frameworks: Facebook Login, Google Maps SDK, and frameworks from GitHub: awesome-ios, Alamofire)
- NavigationController, Segue, URLSession, Gestures, Autolayout.

SKILLS

- Swift
- Tools: Xcode, CocoaPods, Git (Sourcetree)
- Data Storage: Works with: CoreData, NSUserDefaults

PROJECTS

SimplyNotes IOS App
Developer

Project Details:

- Project Name: SimplyNotes
- Role: Developer
- Tools: XCode, Swift, CocoaPods

Project Description & technologies:
This application is developed for simple notes and is based on NavigationController. The storage is based on the CoreData framework. Added editing function, Facebook login screen with video background, pop-up menu, animations, and self-developed user interface.
